

JULY 1996

IMPORT CONDITIONS TO ISSUE VETERINARY HEALTH CERTIFICATE

for the temporary admission of registered horses into
the Czech Republic for a period of less than 90 days

(This certificate must accompany the consignment. It covers only animals in the same category-registered horses-transported in the same railway wagon, lorry, aircraft or ship and consigned to the same destination. It must be completed on the date of loading and all time limits referred to expire on that date).

A diagram of the horse (silhouette) must be completed and accompany this document.

No. of certificate_____

Country of dispatch:_____USA_____

Ministry responsible:_____USDA, APHIS_____

Competent veterinary service:_____VS (State)_____

Reference to accompanying welfare certificate:_____

I. Identification of the animal

Name of the horse	Breed	Age	Sex	Color
-------------------	-------	-----	-----	-------

II. Origin and destination of the animal

The animal is to be sent from:_____

(country and place of export)

through_____/directly to the Czech Republic

(countries)

on foot/by railway wagon/lorry/aircraft/ship(3)_____

(indicate means of transport and registration marks,
flight number or registered name, as appropriate)

Health Certificate No. _____
(Valid Only if the USDA Veterinary
Seal Appears Over the Certificate No.)

Name and address of consignor: _____

Name and address of consignee: _____

III. Health Information

I, the undersigned official veterinarian, certify that the animal described above meets the following requirements:

- a) it comes from a country where the following diseases are compulsory notifiable: African horse sickness, dourine, glanders, equine encephalomyelitis (of all types including VEE), Infectious anemia, vesicular stomatitis, rabies, anthrax;
- b) it has been examined today, shows no clinical sign of disease. Is able to be transported to the place of destination and to the best of my knowledge, it has not during the 15 days prior to this declaration been in contact with equidae suffering from an infectious or contagious disease;
- c) it comes from a holding situated in the center of a region with a perimeter of 30 km in which during the last 6 months no Venezuelan equine encephalomyelitis, dourine, glanders and horse vesicular stomatitis have been reported;
- d) it does not come from the territory infected with African horse sickness;
- e) it shows no clinical signs of contagious equine metritis (CEM) and had no contact indirectly or directly through coitus with equidae infected or suspected from CEM;
- f) within the last 30 days prior to export it has been serologically tested with negative result for;

-infectious anaemia (Coggins test) on: _____

-glanders (complement fixation test at a dilution 1:10) on: _____

-dourine (complement fixation test at dilution 1:10) on: _____

IV. The said animal has been vaccinated in the period of at least 10 days preceding exportation against:

Health Certificate No. _____
(Valid Only if the USDA Veterinary
Seal Appears Over the Certificate No.)

a) equine influenza on: _____

name and kind of vaccine: _____

b) equine rhinopneumonitis on: _____

name and kind of vaccine: _____

V. The animal will be sent in a vehicle suitable for transport of horses, which is cleaned and disinfected in compliance with international veterinary-sanitary requirements and is constructed in such a way that droppings, litter or food cannot fall down during transportation.

VI. The certificate is valid for 10 days. In the case of transport by ship the time is prolonged for the time of voyage.

III. Health Information

a) it comes from a country where the following diseases are compulsory notifiable: African horse sickness, dourine, glanders, equine encephalomyelitis (of all types including VEE), infectious anaemia, vesicular stomatitis, rabies, anthrax;

b) it has been kept in the country of origin for at least 6 months preceding the present exportation, and of this time at least 3 months at the same premises;

c) it has been examined today and shows no clinical sign of disease and is able to be transported to the place of destination and to the best of my knowledge, it has not been in contact with equidae suffering from an infectious or contagious disease during the 15 days prior to this declaration;

d) it is not an animal which is to be destroyed under a national contagious or infectious disease eradication program;

e) it comes from the holding situated in the center of a region with a perimeter of 30 km in which during the last six months no venezuelan equine encephalomyelitis, dourine, glanders and horse vesicular stomatitis have been reported;

f) in the case of breeding horses no outbreak of equine viral arteritis (EVA) has been officially reported during the last six months
or

Health Certificate No. _____
(Valid Only if the USDA Veterinary
Seal Appears Over the Certificate No.)

the animal was tested on a sample of blood taken within 30 days prior to export by virus neutralization test for EVA, with negative result at a dilution 1:4 (1)
on _____

g) it does not come from the territory infected with African horse sickness;

h) it does not come from the holding which was subject to prohibition for animal health reasons of equine encephalomyelitis, infectious anaemia, vesicular stomatitis, rabies or anthrax and had no contact with equidae from a holding which was subject to prohibition for animal health reason.

i) it shows no clinical signs of contagious equine metritis (CEM) and does not come from a holding where there has been any suspicion of CEM during the past two months or had no contact indirectly or directly through coitus with equidae infected or suspected from CEM;

j) breeding animals (except for foals and yearlings) were twice tested with an interval of at least 14 days, the last within 30 days prior to exportation, Bakteriological specimens were taken and cultured negative for contagious equine metritis (CEM) in approved laboratory (not necessary for geldings) (1)

on _____ and on _____

k) within the last 30 days prior to export it has been serologically tested with negative result for (2):

- Coggins test for infectious anaemia on _____

- a complement fixation test for glanders at a dilution of 1:10 on _____

- a complement fixation test for dourine at a dilution of 1:10 (except for geldings) on _____

V. The said animal has been vaccinated in the period of at least 10 days preceding the exportation against (1):

a) equine influenza on _____
name and kind of vaccine: _____

b) other infectious diseases on _____
name and kind of vaccine: _____

Health Certificate No. _____
(Valid Only if the USDA Veterinary
Seal Appears Over the Certificate No.)

V. The animal will be sent in a vehicle suitable for transport of horses, which is cleaned and disinfected in compliance with international veterinary-sanitary requirements and is constructed in such a way that droppings, litter or food cannot fall down during transportation.

VI. This certificate is valid for 10 days. In the case of transport by ship the time is prolonged for the time of voyage.
